Hannah 70 natural wood with lying surface raised (bottom right)

Hannah Natural Wood; 170, 135, 98 and 70 cm Cots - big, bigger, biggest . . . plenty of space and safety for your child

The Hannah is an extremely stable and durable cot., It is specifically designed as a care environment for challenging children whose primary need is to be kept safe in a world where they cannot see the dangers. To protect them against physical harm, for example as a result of leaving the bed in an uncontrolled way, it is possible to have these special beds built with high lattice frames.

Hannah also serves to encourage and facilitate proper motion. It is suitable for children who, in spite of illness and disability, possess sufficient motor competence to effect the transfer into and out of bed independently.

The Hannah is available in the lattice heights 70, 98, 135 and 170 cm. The long side of the standard bed is always fitted with 4 door elements, although 8 doors are an option. Modified custom-made items are possible in respect of size and construction.

There is a very wide choice of platforms with fixed or variable height, profiling or flat. An external door locking system prevents the doors being pushed open by force.

The Hannah is very suitable for padding with Theraposture's fixed or removable padding and soft double glazed windows which allow for good visibility without compromising safety.

The height adjustability from 55 to 95 cm permits the safe and comfortable transfer of the child from a wheelchair or seat directly into the bed. The ergonomic nursing height makes caring for the child easier in all respects. It is also possible for the Hannah to have access to allow a hoist underneath.

Given the bed's load capacity of 150 kg, it is possible for a grown-up to join the child in the bed.

A large range of items made to order are also possible with all Hannah models.

Reasons to buy a Hannah Cot Bed

1. Available in four door heights 70, 98, 135, 170 cm
2. Three bed sizes: 90/170 cm, 90/200 cm and 100/200 cm (Hannah 170 only 90/200 cm and 100/200 cm)
3. Special door locking prevents the doors from being opened from the inside
4. Wide variety of fixed, variable height flat or profiling sleeping platforms
