## Ida Cots

A really flexible cot for many applications at an excellent price. . .

The Ida bed is ideal for a wide range of children with severe illnesses and disabilities. Depending on age of the child and the configuration of the cot, it can meet many needs. With smaller children and with the 80cm or 90cm cotsides, it can be used for those who can pull to standing. For older children it is suitable for those who can sit or pull to kneeling. The variety of options from 170cm and 200cm platforms, 60cm, 80cm and 90cm high sides, 4 or 8 door, profiling or flat platforms, coloured or natural wood and various configurations of plexiglass and traditional dowels make the IDA a good cot to start your search for the perfect environment for your child to sleep in.

We also hold many varieties of IDA in stock, with parts held for others to make deliveries rapid.

The new 60cm of height adjustability on many versions from 35 cm to 95 cm (upper edge of mattress) makes it equally suitable for caring and therapy.

The Ida provides a clearance of 66 cm and is ideally suited for caring for children from a wheelchair.

The IDA comes with Anti-Trendelenburg as a standard option. The bed has sufficient clearance for a hoist to be used.

With a weight capacity of 150 kg an adult can also join the child in the bed.

## Reasons to buy a Ida Cot Bed

1. 170/90 and 90/200 cm platform sizes
2. Extremely height-adjustable up to 60 cm, i.e. very low access level and safe working height
3. Special door locking system prevents the doors from being opened from the inside
4. Flat or 4 section electronically adjustable platforms available
5. 2 heights of side for differing needs: 60cm, 80cm other sizes are available upon request.
6. Sweat and saliva resistant wood treatment in accordance with DIN 71-3 Children's Toys Safety Act
7. Can be used as playpen during the day because of very low access
8. Any combination of dowels and plexiglass panels to meet individual needs. The IDA is well suited to being padded, including Theraposture soft double glazed window padding.
9. Theraposture safe base can be fitted to this cot for additional security.
10. Custom-made units to meet the specific requirements of the patient are possible
11. The IDA is a very cost effective solution and its price is competitive with any other cot on the market, most of which do not have the IDA build quality.
