

the ROTOFLEX

Single and Double Combination

Creating Solutions to Maintain Independence

the ROTOFLEX

The unique solution to getting in and out of bed without assistance

 THERA • Posture
We won't sell it and forget it!

the ROTOFLEX

Creating solutions to help maintain dignity, independence and save money too!

You can independently adjust the leg and back sections to a comfortable position.

Every Rotoflex bed is supplied with:

- Two sets of purpose fitted sheets with a pillow case sewn into position. This keeps your pillow where you want it and prevents it from falling to the ground.
- A battery back-up that will accept eight separate plug in devices and allow continued use in a power cut.
- Two removable side rails.
- A Tempur Memory Foam Mattress offering a high degree of pressure relief.

The Rotoflex can also help you stand from a sitting position by using the variable height adjustment.

A walking aid or stick can be positioned within easy reach.

Ask us about:

- A three year full guarantee!
- Four week suitability guarantee!
- Buy back option guarantee!

the ROTOFLEX

Bed Turning System - Another great innovation from Theraposture.

To use the Rotoflex you simply need to be able to get to, and then sit in the chair.

By pushing and holding just one button you will activate the computer controlled programme that will rotate you and then place you in the bed.

the ROTOFLEX turning system has been developed to maintain independence within the home.

It's unique rotational system can easily and safely transfer users between a sitting position and a sleeping position.

This is simply achieved by pushing and holding just one button on the easy to use hand control.

Rotation can be programmed to turn either left or right to suit the room situation.

New 4ft wide Rotoflex now available.

Professionals: Two carers, twice a day to assist with bed transfers typically costs on average £58.00 per day. One Rotoflex will be paid for in under 4 months!

the ROTOFLEX has a variable height platform, to assist carers and bed transfers.

We won't sell it and forget it!

the ROTOFLEX

Double Combination - If you and your partner have different needs, you can still share the same bed.

If lifting legs into bed is problem, then look no further than the Rotoflex. This is the only bed of it's type and is widely acknowledged as the only product available that will transfer you in and out of bed, safely and without assistance.

A purpose built assistive bed that looks at home in your home

Theraposture **will not** sell a Rotoflex bed without conducting a full assessment that includes a product demonstration to ensure its suitability in your situation.

An assessment includes an opportunity to try a single Rotoflex in an accessible location.

The Rotoflex has proven to be an innovation that truly offers independence and potential huge cost savings when compared with the alternatives. These alternatives may be hoisting; inflexible and costly homecare arrangements; dependence upon partners, family or ultimately moving into residential care.

Often the everyday task of lifting legs in and out of bed may become difficult or impossible. This severely compromises independence. The Rotoflex can get your legs and indeed your entire body into the centre of your bed at the touch of a button. We are now able to offer The Rotoflex as part of a Double Combination allowing couples to stay together in their shared bed. It is well documented that The Rotoflex is the only device available that is able to transfer the user safely and efficiently into the centre of their own bed.

the ROTOFLEX

Double Combination - Solutions that create and help to maintain independence in your own home.

The Rotoflex can be on either side of the bed.
We can also provide a solid Oak surround with matching furniture.

Why buy a Rotoflex or Rotoflex Combination?

- The Rotoflex bed is also a fully functioning variable height and profiling bed.
- The Rotoflex solves the problem of lifting legs into bed with a touch of a button.
- Reduced carers assistance means reduced carers cost and obviously this also creates independence.
- No hoisting needed therefore reducing costs.
- Couples may have different needs. This does not have to result in using separate beds.
- The Rotoflex can relieve frail and elderly partners of the responsibility and effort in assisting loved ones when carers are not available.
- 20st (127kg) user capability.

The Rotoflex has a variable height platform to assist carers.

The Rotoflex can also help you stand from a sitting position by using the variable height adjustment.

A walking aid or stick can be positioned within easy reach.

Within a Double Combination, you can specify a Rotoflex next to:

- A flat non functioning platform.
- A profiling only platform.
- A profiling and variable height platform.

In any combination!

Ask us about:

- A three year full guarantee!
- Four week suitability guarantee!
- Buy back option guarantee!

Who are Theraposture?

Theraposture are a privately owned family business, based in Westbury, Wiltshire, located between Bath and Salisbury and have been in business for over 25 years.

Our products are often sourced through Occupational Therapists and increasingly by individuals and their families. In all cases, we provide the same assessment based user-centred approach with one price for all.

We will not sell something that does not do the job, and we will not run away if something is not right. We advertise in the trade press and specialist publications, NOT directly to consumer. Most of our business is sourced through Occupational Therapists, either as previous contacts or as new recommendations. Our aim is to satisfy all of our customers so that they will be happy to come back. It's working so far!! We have product available for no obligation demonstration, as well as joint assessment.

All we want is for you to get in touch.

Theraposture are active members of the British Healthcare Trades Association and as such we fully comply with their OFT Approved code of conduct. This is because we do not want to be tarred with the same brush as certain companies who appear regularly in the newspapers and on television consumer programmes accused of taking advantage of vulnerable situations.

The BHTA exclude companies that behave in such ways to protect you. Theraposture always put our customers and our good name first.

There are many things to consider when buying a bed that will be helping you, a family member or client:

- Is the company reputable?
- Is the bed going to be reliable?
- Will the bed meet my needs fully both now and in the future?
- What happens if things go wrong?

There are many companies selling lots of different types and qualities of bed. Finding the correct product and company can be a problem. We firmly believe that the only way to be sure that you are getting exactly what is needed, is to have a full assessment of the users needs; wants and risks including a product demonstration and a written report. This will provide the opportunity to see exactly what you are getting and to be able to confirm that it will be a suitable solution.

This service is free to purchasers, both private and professional and is there to avoid disappointments, misunderstandings and potential accidents from happening.
