

## Examples of the multiple settings

There is a choice of two side heights - 65cm & 43 cm

Timmy I coloured with all four side lattices dropped (top)

Timmy I coloured with front lattice dropped (bottom left)

Timmy I coloured in profiled setting plus pedestal (bottom right)

Timmy II coloured with mattress in highest position (top)

Timmy II Junior coloured showing profiling (bottom left)

Timmy I Junior coloured with raised side lattices (bottom right)

## Timmy I/Timmy II Coloured Cots

The Timmy bed is ideal for children with serious and severe illnesses and disabilities who cannot sit up on their own.

The colour design of this bed with animal motifs printed on the plexiglass panels increases the child's acceptance of the bed and promotes visual perception. Moreover, it stimulates the child's imagination. There is an alternative with traditional dowels.

There are two versions of the Timmy: Timmy I with side lattice height of 65 cm and Timmy II with 43 cm high lattices. All four sides can be lowered to varying levels. This also enables care procedures from the head and foot ends. It is well-suited for nursing severely ill and disabled children, who for example need artificial respiration and feeding.

Two removable posts (optional) make the bed highly suitable as a therapy surface. Timmy I is height adjustable from 80 cm to 120 cm and Timmy II from 62 cm to 102 cm at the upper edge of mattress. The variable height also enables the therapist/parent to administer care at the correct working height.

All lying levels are reduced by 13 cm if castors are not fitted. Timmy has clearance below with its 16,5 cm castors, so that hoists can also be used. With a weight capacity of 150 kg an adult can also join the child in the bed.

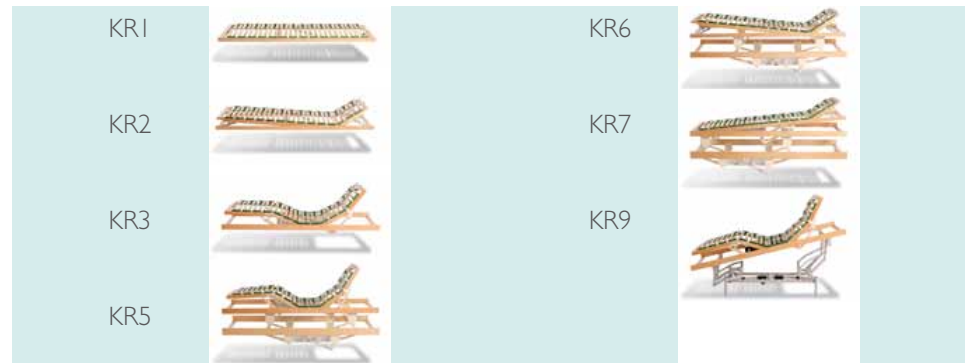

## Reasons to buy a Timmy Cot Bed

1. Simple handling with 4 easy-to-use drop side lattices, allowing access from all sides.
2. Can be combined individually with different sleeping platforms.
3. Mechanism to adjust therapy and care-level to a safe working height.
4. Versatile thanks to high castors, also practical for cleaning.
5. Side lattices secured with locking pins.
6. Sweat and saliva resistant wood treatment in accordance with DIN 71-3 Children's Toys Safety Act.
7. The beautifully finished solid wood is warm and comforting and fits with the calm of a bedroom.
8. Patient weight capacity of up to 150 kg.
9. Functional accessories.
10. Solidly crafted design ensuring great stability, security and longevity.
11. Four bed sizes: 70/140 cm + 90/170 cm + 90/200 cm + 100/200 cm.
