

Dual Motor Riser Recliner Chair

The Dual Motor action allows the leg rest and the back to be operated independently of each other, achieving an infinite number of sitting and reclined positions. This allows the user to sit upright with their legs fully elevated to a horizontal position, or to be fully reclined for napping, or indeed any where in between these positions.

The mechanisms used are made in the UK and are very strong, quiet and reliable. We can offer a fully made to measure chair in a style and fabric of your choice at very reasonable prices.

We provide a free of charge assessment of your needs, wishes and risks in your own home, with absolutely no obligation to purchase. To give you peace of mind, we are members of the BHTA and conform to their Office of Fair Trading approved Code of Practice, which includes standards of behaviour and ethical guidelines for member staff operating in client's homes.

All chairs have a 5 year warranty on all actuators and electronics other than the hand control. Hand controls upholstery and mechanisms have a 2 year warranty.

Hand Control

The Dual Motor Chair Riser Recliner has 4 buttons allowing you to move the back rest forwards or backwards and the leg rest up or down. Once the leg rest is all of the way down, the chair will then rise to help you achieve a standing transfer. Our hand controls are the best you can get. We believe that cutting corners to save a few pounds can result in reliability issues.

Sizes Available

| Action of Chair | Capacity | Width | Height | Depth | Back Height |
|--------------------------|-----------|------------|--------------|------------|-------------|
| 2 Motor Petite | 20 stones | 18" to 24" | 16" to 20" | 16" to 20" | 24" to 33" |
