Nevertheless, many electrically operated specification. As the benchmark for all adjustable bed British Standard, it is recognised across entrapment risks are minimised. As a for a bed so that safety is maximised and legs who need to be elevated in bed is least.

**Tailor-made and future-proof**

Chosen electrically operated beds, not just physically operated beds, are specifically designed for you. They allow you to elevate your head, arms, and legs and provide support wherever needed.

The most sophisticated design is Rotoflex Rotating beds, which can help ensure you are supported and comfortable in all positions.

In home assessment, a supplier will ensure the bed will enhance lifestyle and wellbeing. It is wise to choose a company that provides a truly bespoke service. It is important to choose a company that will offer greater support and comfort.

**Ergonomic design**

Ergonomic design is achievable with the help of Rotoflex Rotating beds. Rotoflex beds are specifically designed for you. Rotoflex beds provide the widest range of rotating beds, available in a wide range of sizes and styles.

During a home assessment, it is important to consider the position of the bed, the comfort of the bed, and the ease of use. The bed should be comfortable, and the slats should be the right size and shape.

During the assessment, it is important to consider the position of the bed, the comfort of the bed, and the ease of use. The bed should be comfortable, and the slats should be the right size and shape.

**Save money with buy back schemes**

The cost of purchasing a rotating bed is not a concern. If you purchase from a trusted specialist, the cost of purchasing a rotating bed can be reduced.

Renting and refurbished beds are available, which can be very beneficial if you are on a tight budget.

**A range of quality mattresses**

Quality of care is vital for any patient. Rotoflex beds provide quality sleep and comfort. Rotoflex beds provide a range of quality mattresses, which can be tailored to your specific needs.

The British Biodynamic Health Association offers a guide to the best beds for patients. The guide provides information on the best beds for patients, and how to choose the best beds for patients.

**Rental and refurbished beds**

Furnishings and durable beds are very beneficial if you are on a tight budget. Rotoflex beds provide a range of rental and refurbished beds, which can be very beneficial if you are on a tight budget.

**How to choose the right rotational bed and supplier**

An electrically operated adjustable bed that includes powered rotation can help you get in and out of bed on your own terms. Through functional movement, the bed will be able to move in any direction, allowing you to move from a sitting position to a lying position, and vice versa. It is important to choose a bed that includes powered rotation, as it will help you move in any direction.

**My Theraposture Rotoflex**

I have chosen My Theraposture Rotoflex for my day. It is the start of my independence, as I can control my bed and move it as I need. My Theraposture Rotoflex is specifically designed for me, and it is the best bed I have ever used.

When two carers are replaced, the Rotoflex® from Theraposture is proven to save over £27,000 per year in care costs and pays for itself in less than 14 weeks.

Assessment based provision
Everyone’s needs are different so ethical and established manufacturers such as Theraposture will always assess you before recommending a bed. Through their professional expertise they will produce an objective and comprehensive product recommendation that will maximise your independence at home.

Ensure you receive a Suitability Guarantee
As a rotating bed can be a crucial piece of equipment for remaining independent at home, it is important that the product is ideally suited to you needs. Established manufacturers will complete a comprehensive assessment of your needs and provide a tailor made bed and service accordingly. However, what happens if you change your mind after delivery?

As a rotating bed is a crucial piece of equipment for remaining independent at home, it is important that the product is ideally suited to your needs. Established manufacturers will complete a comprehensive assessment of your needs and provide a tailor made bed and service accordingly. However, what happens if you change your mind after delivery?

If you select a quality rotating bed it will deliver independence at home. However, choosing an inferior product reduces the possibility of enjoying decades of well-being and comfort. It is as important to consider the designer and manufacturer for a rotating bed as it is for any other piece of major equipment. The designer and manufacturer should provide a better guarantee. From the earliest stages of design and development to the final testing, the Rotoflex® from Rotoflex® provides a 35 year guarantee on mechanical and components. This means that if the Rotoflex® fails to work for any reason during this period the manufacturer will replace the Rotoflex® at no extra cost to the user. If the Rotoflex® needs to be repaired during this period the manufacturer will also replace the Rotoflex® at no extra cost to the user. This is a guarantee that is available on all Rotoflex® beds and is unique to Theraposture.

Theraposture provides a unique low access version of the Rotoflex®. The Rotoflex® Low Access version can be delivered in less than 14 weeks. The Low Access version is suitable for clients who have balance and standing difficulties which such as MS and Parkinson’s can mean that one’s forward to the point of no return, ready or not.

When choosing a rotating bed consider the specific needs of the client and choose a company that can provide a tailor made bed to suit their needs. This involves a home visit by a Trusted Practitioner. This involves a home visit by a Trusted Practitioner who will always assess a user before recommending a bed. Quality beds pay for themselves

When selecting a quality rotating bed it will deliver independence at home. However, choosing an inferior product increases the possibility of ageing discomfort, wellbeing problems and compromised safety through unstable mechanisms and poor design. Avoid low-quality products and you will benefit from tranquility and performance greater than the low run.

Select a reputable and reliable turning solution and the number of care costs can be reduced! You have to consider if you will need it in more circumstances in the future. This can be virtually or even worse the cost of a hospital ward bed.

When two years are replaced the Rotoflex® Theraposture® is proven to save over £20 million per year in care costs and pays for itself in less than 14 weeks.*

Charmingly isn’t always the best

It is commonly said that ‘you get what you pay for’. However, this does not always hold true. This investment in product functionality controls. A safe rotating bed will rotate at any point. The need for an intuitive hand movement that can be stopped by the user is essential. To ensure this the Rotoflex® rotating bed must remain stable when moving the user.

Travel and compromised safety through unreliable mechanisms can also be avoided. From Theraposture is proven to save over £27,000 per year in care costs and pays for itself in less than 14 weeks.*

From the initial contact with a rotational bed supplier the Rotoflex® Theraposture® is proven to save over £27,000 per year in care costs and pays for itself in less than 14 weeks.*

Only choose a bed with a platform (without mattresses) that raises 80cm for floor level.

Widest range of tailor-made singles

Engaging, rotating beds that is safe and effective assistive bed must remain stable when turning the user. The precision to and from rotation means that the bed is designed and engineered to ensure that it remains stationary.

It is importance to recognise that certain conditions such as MS and Parkinson’s can mean that standing balance cannot always be achieved and therefore there is a requirement to maintain the position. As a general good practice, you should always rotate your care bed well below the waist level. To do this the Rotoflex® bed will allow this.

Theraposture®

The Rotoflex® is the original and proven turning bed. A bed that is designed and engineered to ensure that it remains stationary.

Choose Theraposture® on our website.

Widest range of tailor-made singles

The Rotoflex® is protected by patents.

All our beds are designed and engineered to ensure that they are stable when the bed is in motion. This makes it possible to achieve maximum support and comfort.

Caring is what we do

In this regard, our professionals will make sure that you have the best possible experience.

Controls need to be functional and easy-to-use

From the initial contact with a rotational bed supplier the Rotoflex® Theraposture® is proven to save over £27,000 per year in care costs and pays for itself in less than 14 weeks.*

Assessment based provision

When two care workers are replaced, the Rotoflex® from Theraposture is proven to save over £27,000 per year in care costs and pays for itself in less than 14 weeks.*

Strong metal, ergonomically designed mechanisms

Adjustable, rotating beds must be high-quality products that should be considered for a longer time. Therefore, it is important to consider the value of a product that meets the above requirements.

Ensure you receive a Suitability Guarantee

As a rotating bed can be a crucial piece of equipment for remaining independent at home, it is important that the product’s suitability suits your needs. Leading manufacturers will complete a comprehensive assessment of your needs and recommend a tailor-made bed accordingly. However, what happens if you change your mind after delivery?

When choosing a rotating bed, it is essential to consider the potential for badly designed rotating beds to have a lower level of refinement. If the product has been manufactured to a low standard, even design faults can result in performance issues. The precision and reliability of the bed can be affected by the quality of the engineering and manufacturing in the long run.

Products that have been developed and tested are the most reliable and effective. This can be seen when high quality beds are compared to cheaper, less reliable products. If a product has been recommended by a specialist such as Theraposture to arrange a home assessment before purchase. This guide will help you make an informed decision regarding the ideal rotating bed and supplier.

Controls need to be responsive and easy-to-use

The Rotoflex® Low 175 from Theraposture. An adjustable seat depth. If users are under 1.80m and the seat is shorter in length, then there is an increased risk of falling to lower levels of refinement. If a product has been designed to ensure that it’s proportions mirror the human body then there is an increased risk of falling to lower levels of refinement. There is only one turning bed that provides fully supported leg and foot elevation – the Rotoflex 200 Mk2.

This functionality is a world-first and is available as an optional extra on all Rotoflex beds. Previously on adjustable beds it was still possible to have a clash between the rotational sleeping surface and the footboard. The Rotoflex 200 Mk2 eliminates this clash with a redesigned mechanism that fully supports the feet and encourages safe transfers between the rotating sleeping surface and the footboard.

The Rotoflex 200 Mk2 is the benchmark for all adjustable bed systems within single beds or as part of a double combination bed. If varying functionality systems are specifically designed for you will offer greater support and comfort. Without the ability to raise a bed to an appropriate height, carers are exposed to significant disadvantages. With a lower mattress position users can still achieve stable transfers without the need for assistance from a carer or relative, this can provide significant time and care cost savings, and of course improves independence.

An electrically operated adjustable bed that includes powered rotation can help you get in and out of bed on your own terms. Through functionality that moves the sleeping surface between the sleeping position and the seated position (at right angles to the bed), you can achieve safer, independent transfers. Without the need for assistance from a carer or relative, this can provide significant time and care cost savings, and of course improves independence. These schemes can be very beneficial if you select a bed from a company that will guarantee to buy the bed if a relative, this can provide significant time and care cost savings, and of course improves independence. But it does not have to be. If a bed is specifically designed to fit a particular space that is not achievable, this can provide significant time and care cost savings, and of course improves independence.

Ergonomic design

Choosing a turning bed that has been specifically designed for you will provide you with more personal assistance and comfort. Moreover, there exists a number of adjustable bed manufacturers who provide a wide range of options to suit your needs. If you relax a bed from one of these manufacturers, you will receive a comfortable bed, tailor-made to your specific requirements.

There should be a choice of rotational speeds, either slow or fast, with the option of slow or fast build-up. If you are unable to raise a bed to an appropriate height, carers are exposed to significant disadvantages. With a lower mattress position users can still achieve stable transfers without the need for assistance from a carer or relative, this can provide significant time and care cost savings, and of course improves independence. But it does not have to be. If a bed is specifically designed to fit a particular space that is not achievable, this can provide significant time and care cost savings, and of course improves independence.

A double combination bed treatment can be a sign of incontinence and reflux however if you take certain precautions that demonstrate more value than your prescription drug. The British (Healthcare Industry) Association’s guide to health. Companies that regularly work successfully with ethical fund providers are likely to maintain or surpass their reputations for quality and service.

There are an increasing number of turning beds on the market that vary in quality design, the way they work and their suitability for users of different heights and weights. Being able to identify relevant effectiveness and benefits is important when choosing a trusted and proven solution.

This guide will help you select a rotational bed that will deliver ultimate comfort and performance. If a product does not include all of these factors then it may not provide a satisfactory user-experience and your independence could be compromised.
There is only one turning bed that provides fully supported leg and foot elevation – the Theraposture Rotoflex 200 Mk2.

Ergonomic design
Diving a rotating bed that has been specifically designed for you will ensure maximum comfort and support. However, it’s often a matter of trial and error when it comes to finding the right bed for your needs.

There is no one size fits all when it comes to rotating beds. It’s important to choose a bed that is specifically designed to meet your needs. A bed that is too small or too big will not provide the support and comfort you need.

One of the key benefits of a rotating bed is that it can help to prevent muscle atrophy and improve circulation. However, it’s important to choose a bed that is the right size for your body. A bed that is too small will not provide the support you need, while a bed that is too big may make it difficult to move around.

Vital information for the future
If you are a shorter person or have a smaller body frame, you may need to consider a different bed size. Rotating beds come in a range of sizes, so it’s important to choose a bed that is the right size for your body.

Save money with buy back schemes
It’s important to consider the cost of a rotating bed before you make your purchase. Rotating beds can be expensive, so it’s important to consider the cost of a rotating bed before you make your purchase. Rotating beds can be expensive, so it’s important to choose a bed that is the right size for your body.

The British Healthcare Trades Association (BHTA) has set up a series of buy-back schemes to help people who need a rotating bed. These schemes can help to reduce the cost of a rotating bed, so it’s important to consider them when choosing a rotating bed.

A range of quality mattresses
The Theraposture Rotoflex offers the widest range of rotating beds:
- lowest access for smaller or shorter users (45cm)
- different widths including 90, 100, 110 and 120cm
- highest user weight capacity – up to 300kg SWL

How to choose the right rotational bed and supplier
An electrically operated adjustable bed that includes powered rotation can help you get in and out of bed on your own terms. Through functional pain the sleeping surface between the sleeping position and the seated position (at right angles to the bed), you can achieve safer, more independent assistance even if needs change.
