WINNER OF EXCELLENCE IN CARING AWARDS 2018-2019

Theraposture
YOUR INDEPENDENCE, OUR COMMITMENT
The Rotoflex from Theraposture is the original and proven rotating bed system. Getting legs into bed is a problem for many people – the Rotoflex offers the solution. At the touch of one button, the Rotoflex will help you into bed, out of bed and will also help you stand up safely. The precision mechanisms are smooth, quiet and strong so the transfer experience is pleasant and relaxing – you are always in total control.

"Assistive products can be hugely beneficial in promoting independence, positive health and wellbeing. As a Healthcare Professional, I recommend the award winning Rotoflex range from Theraposture because of its ability to achieve this. Independence with bed transfers is a realistic and achievable goal with the Rotoflex. The Rotoflex is recommended for clients with reduced range of movement and is of significant benefit to those living with progressive neurological conditions."

Shaun Masters, Occupational Therapist

Being able to get into and out of bed independently will reduce assistance from partners and carers

The Rotoflex from Theraposture is the original and proven rotating bed system. Getting legs into bed is a problem for many people – the Rotoflex offers the solution. At the touch of one button, the Rotoflex will help you into bed, out of bed and will also help you stand up safely. The precision mechanisms are smooth, quiet and strong so the transfer experience is pleasant and relaxing – you are always in total control.
The proven solution to get in and out of bed –

Theraposture supply the largest choice in quality rotating adjustable beds, designed to get you in and out of bed independently, safely and on your own terms.

Standard Rotoflex features:
- Powered rotation, powered profiling and powered height adjustment
- Single button operation for complete transfers
- Patented lifting frame – will not tip over
- Patented mattress retention system – holds mattress firmly in place
- Supplied with RW17 medium risk mattress with wipe down cover as standard
- Extensive range of interchangeable mattress options
- Fully inclusive 3-year warranty for new beds
- Supplied with two sets of fitted sheets with a sewn in pillowcase – your pillow will not drop to the ground when in the chair position
- Supplied with a battery back-up to make sure the bed continues to work if there is a mains power failure
- Meets BSEN 60601-2-52 (medical bed standard)
- Buy back options
- Vertical seat rise in the chair position – the Rotoflex will intentionally NOT tip you forwards like alternative rotating beds you may find

Buy or rent new or used Rotoflex Beds
Award winning Rotoflex® 235 Plus

90cm wide Rotoflex bed for one person supplied with the patented Rising Heel Support as standard

The Rotoflex 235 Plus is the latest addition to the long established proven range. This Occupational Therapy Show award-winning bed is a 3’ wide (90cm) Rotoflex for one person. This Rotoflex 235 Plus is our standard model and is available from stock.

- Rising Heel Section included as standard
- Central Locking as standard
- Safe working load of 235kg
- Maximum patient weight of 200kg (31 stones)

The Award Winning Rotoflex 235 Plus was chosen by an independent panel of experienced OTs as the winner of the Care in Excellence category at the 2018 OT show in Birmingham. (All alternative rotating beds / attempted copies of the Rotoflex were also at the same show).

We believe that the Rotoflex is the best, most proven and the market leading rotating bed system. It is clearly different in ways that are user focussed and cannot be directly copied.

SEAT DEPTH: 46CM
MATTRESS / SEAT HEIGHT: 53.5CM
BED WIDTH: 3’ (90CM)
MATTRESS LENGTH: 210CM

AN IMPORTANT UNIQUE INNOVATION: PLEASE READ PAGE 9
rotoflex® Low 200 –
THE ONLY LOW ACCESS ROTATING BED

The lowest Rotoflex in the range ideally suited to smaller users of typically 5’3” or less

At its lowest position, this Rotoflex provides a distance of only 45cm between the floor and mattress surface. This allows users with shorter legs to sit more comfortably by getting their bottom to the back of the seat, and keeping their feet safely on the ground.

- Meets BSEN 60601-2-52 safe working height requirement
- 50cm lift motors to compensate for low entry level
- Safe working load of 200kg
- Maximum patient weight of 150kg (23.6 stones)
Rotoflex® 200 Mk2 Bespoke – The adaptable Rotoflex Bed

The Rotoflex 200 Mk2 Bespoke can be supplied wider, longer, shorter and can be specified with a range of different aesthetic finishes such as upholstered and solid oak surrounds. The Rotoflex 200 Mk2 Bespoke can be used either as a bed for one person, or as part of a Double Combination for a couple to share. The partner half of the bed can be supplied with a choice of functions. The base of a combination bed can be made as one or could be made in two halves so that they can be separated to allow carer access to both sides of either half. The flexible nature of this Rotoflex bed continues with a modular seat depth where there are choices of 46cm through to 55cm, catering for all circumstances and requirements.

- Choice of aesthetically pleasing bed finishes
- Available as a bed for one or as part of a Double Combination
- Safe working load of 200kg
- Maximum patient weight of 150kg (23.6 stones)
- Optional Rising Heel section
- Modular seat depth from 46cm to 55cm
- Wider sizes available – 90, 100, 110 and 120cm
- Can be made shorter or longer

Every Rotoflex comes with a 14-day Suitability Guarantee

SEAT DEPTH: 46 TO 55CM
PLATFORM HEIGHT: 39CM
MATTRESS / SEAT HEIGHT: 53.5CM
BED WIDTH FOR TWO PERSONS: 5'6", 6’ WIDE OR WIDER

Rotoflex® 300 Heavy Duty

For users weighing up to 250kg (39 stones)

The Rotoflex 300 Heavy Duty is the most capable turning bed on the market. It has a safe working load of 300kg and maximum patient weight of 250kg (39 stones).

Like the Rotoflex 200Mk2 Bespoke, this bed can be adapted in a number of ways. It can be supplied wider, longer, shorter and can be specified with a range of different aesthetic finishes such as upholstered and solid oak surrounds. The Patented Rising Heel Section is an option and each bed is supplied with a pair of handle bar grips as standard.

- Choice of aesthetically pleasing bed finishes
- Safe working load of 300kg
- Maximum patient weight of 250kg (39 stones)
- Optional Rising Heel section
- Modular seat depth from 46cm to 55cm
- Wider sizes available – 100, 110 and 120cm
- Can be made shorter or longer

Powered rotation, profiling and height adjustment.
Powered Rising Heel Section is optional

SEAT DEPTH: 46 TO 55CM
PLATFORM HEIGHT: 41CM
MATTRESS / SEAT HEIGHT: 57.5CM
MATTRESS LENGTH: 220CM

AN IMPORTANT UNIQUE INNOVATION: PLEASE READ PAGE 9
PATENTED Powered Rising Heel Support

A world’s first – the Rotoflex is the ONLY rotating bed that can be supplied with an electrically operated rising heel support, to ensure that the calf and foot are properly supported when elevated.

All alternative rotating beds include a STATIC separate mattress piece that is at the foot end of the bed. This is to provide the necessary clearance to allow the legs and main mattress section to rotate without hitting the footboard. The consequence of this is that only part of the lower leg can be supported when elevated in bed, meaning that the foot and part of the calf will overhang and be unsupported.

The Rotoflex bed is available with a Patented solution – the Rising Heel Section. This allows the whole of the leg and foot to be correctly supported when raised in bed.

- Totally unique and patented
- Available as standard on the Rotoflex 235 Plus
- Optional on the Rotoflex 200Mk2 Bespoke and Rotoflex 300 Heavy Duty
- Absolutely vital for those who need to raise their legs when in bed
- Prevents pressure points on the back of the calf
- Eliminates the need for loose additional blocks of foam and someone to position them
- Can be retrofitted to all Rotoflex 200 and 300 beds made after 2009

Improved circulation, increased drainage
Completely level surface
No pressure point on calves

(Not currently available on the Rotoflex LOW 200)
Rotoflex Mattress Options

Theraposture offer a wide selection of specialist mattresses for the Rotoflex Bed range. These are available when you purchase a new bed or can be upgraded retrospectively should your needs change.

RW14
Castellated reflex foam mattress suitable for low risk users with Waterlow scoring up to 14.

RW17 (standard)
Triple layer memory foam mattress suitable for medium risk users with Waterlow scoring up to 17.

RW24
Triple layer fibre filled memory foam mattress suitable for high risk users with Waterlow scoring up to 24.

RO-HO dry flotation
This Neoprene mattress is a zoned, advanced pressure-relieving surface that is ideal for users requiring high levels of protection against pressure related issues – up to grade 4 (very high risk).

Rotoflex alternating air
For those requiring a very high level of pressure redistribution (up to grade 3), the Rotoflex is also available with a dynamic air cell mattress. This mattress has been specially designed to be operational even when it is being rotated.

Sewn in pillow case
Patented mattress retention system – the mattress is firmly held to the moving platform

Pressures sore prevention and management

Rotoflex Accessories

Multi Positional Grab Handle
Sewn in pillow case
Lifting pole
Handle bar grips for wider beds
Multi Positional Grab Handle
Side rail/handle (standard) – removable and folds up through 90 degrees
Castor and feet options

AN IMPORTANT UNIQUE INNOVATION: PLEASE READ PAGE 9
The Rotoflex can reduce carer assistance with bed transfers from two carers to one, and in some cases can eliminate carer assistance altogether delivering true independence. This proven solution can allow you to safely get in and out of bed on your own terms without the cost of carers. With a Rotoflex there may be no need to move into expensive residential care so you can remain in your home for longer.

Where two home carers are replaced, the bed could pay for itself typically in just 14 weeks, saving £27,500 as a result!

* Based on average cost of 2 carers visiting twice a day

My Theraposture Rotoflex bed has been so fantastic, it has changed my life. I could not live independently at home without it.

Ernie Burton, East London, Rotoflex owner
Frequently asked questions

Who can benefit from the Rotoflex?
The Rotoflex is recommended for clients with reduced range of movement in upper or lower limbs and is of significant benefit for specific conditions such as Parkinson’s and Multiple Sclerosis. Parkinson’s clients can often experience ‘freezing’ when transferring from their bed. The vertical lift (height adjustment) of the bed when in the chair position means that the user will not be tipped forward towards the point of no return, ready or not.

The Rotoflex is a vital component in regaining independence with bed transfers in a realistic, safe, consistent and achievable way. The Theraposture Rotoflex truly delivers independence as it is a real alternative to carer assistance or hoisting. In this situation the bed can pay for itself many times over as the cost of care at home or in a residential setting is so high.

What charities do Theraposture work with?
The Parkinson’s UK Charity and the MS Society both work in close formal partnership with Theraposture, because we are trusted and our products are proven.

Why the Rotoflex is the market leading solution?
The Rotoflex range of beds has evolved over a period of more than 20 years with continual development centred on the needs of those who use them. The important parts of the design are patented and cannot be copied. The Rotoflex is a proven solution.

Can I buy other alternative rotating beds?
Yes, you can but they are not a Rotoflex. Good ideas are often copied and the Rotoflex is no exception. You will find at least five different organisations selling what look like a Rotoflex bed – they are very different in some very important ways (both product and company).

How can I be sure the Rotoflex is suitable for me before I buy one?
The only way to be sure that the Rotoflex is the solution a client is searching for is to try one. This is a free of charge service that can be achieved in several ways, including a home assessment; a combined delivery and home assessment; an assessment at a local accessible location or a factory visit.

What happens if the bed isn’t suitable for me after purchase?
We provide a 14 Day Suitability Guarantee that enables the client to return the bed for a refund or exchange the bed or mattress for an alternative.

What happens if I no longer need the Rotoflex?
Theraposture will guarantee to buy back a Rotoflex Bed up to 36 months old if purchased new and with up to 24 months of ownership if purchased reconditioned.

What if I cannot afford to buy a Rotoflex?
We often have refurbished beds available at a reduced cost. These will all be factory assured, supplied with a new mattress and bedding, and come with a fully inclusive guarantee.

You may also consider renting either a new or a refurbished Rotoflex with an initial one-off up-front payment and an affordable monthly rental.

Can I trust Theraposture?
Absolutely, yes you can.
Theraposture are open, clear and transparent about the price of a product. If another company won’t give prices up front then how can you trust them? Price secrecy is a tactic. Some companies will not display prices on their website or in their brochures and often won’t disclose them over the phone so that you are enticed into booking a home visit from one of their “salesmen” as that is the best chance to sell at the prices they want to.

Be safe and reassured by dealing with an ethically driven company like Theraposture who put customers first. Therefore, key charities are happy to work with us and recommend only Theraposture and the Rotoflex bed.

Reduce carer intervention, maximise independence and eliminate or reduce care costs with a Rotoflex from Theraposture. Call us to discover how a Rotoflex bed can help you remain independent and also help those assisting you. We will be happy to organise a free of charge assessment and demonstration for you.
