Theramatic - upholstered enclosures

Modelled on a domestic appearance in a fabric and style of your choice.

Theraposture's stylish range of upholstered beds are designed to look like divan beds found typically in a domestic situation.

The upholstered range of adjustable beds from Theraposture are built using the same high quality metal mechanisms as we use in the solid oak range – the only difference is the way the beds look.

For those who prefer to have a fabric divan style surround to their bed, there is a choice of:

- | | |
|------------------|-----------------------|
| 1 Belgian Damask | 2 Faux leather |
| 3 Ultra leather | 4 Waterproof Panvelle |

Or any other fabric that you like

Separable halves

With an upholstered surround it is possible to have two individual matching enclosures than latch together (because the enclosures are much lighter than the oak).

This allows for separation of the two sides to gain access to both sides of either half. For situations where carers are involved, this is a great help in reducing the risk of back injury. One or both beds will be mounted on locking castors allowing easy separation.

If you require your bed to be separable, your double headboard will have to be mounted on the wall, or if on beds will need to be two separate headboards. The Theraposture latching device provides an easy way to split the two bed halves and then re-secure. The use of castors can provide access for a hoist if needed.

Upholstered beds for individuals

Theraposture's stylish range of upholstered beds are designed to look like divan beds found typically in a domestic situation. They also help overcome everyday difficulties through their functionality and provide you with the opportunity to remain independent in your own home without the sacrifice of intrusive adaptation. Beds for individuals can be any size and can have any function to help with everyday positioning and transfer difficulties. (See our accessories page for function and size options).

Who said that a single bed has to be 3' (90cm) wide? Your upholstered Theraposture bed can be any size that you choose up to 5' (152cm) wide.

For complimentary furniture, Theraposture's collection of oak bedside cabinets, chests of drawers and wardrobes perfectly suit this upholstered bed range (see our accessories page).
