

- The overall value of our products and services and quality of our organisation and approach, make us a regular choice for Occupational Therapists nationally, and one of the leading supplier of made to measure chairs in the UK.
- Our company has been making individualised products for 30 years. We are in healthy order and expect to be around for many years to come.
- We provide a free of charge, no obligation home assessment of your needs so that we fully understand your situation. Often this will involve a product demonstration so that you can be sure the action of the chair is compatible with your body.
- Our assessors are accredited Trusted Assessors (Disabled Living Foundation: (Advanced level) and Theraposture Ltd are members of the British Healthcare Trades Association, comply with their Code of Practice, and have specific training and experience in working with clients with disabilities.
- By doing an assessment, Theraposture Ltd takes the full responsibility for the Chair meeting the needs of the user and their carers. If there are any problems with your chair once it's delivered, it is our responsibility to sort them out.
- Your comfort is more likely to be achieved in a chair that is made for you to your own unique size requirement. After all, an ill-fitting standard sized chair can lead to even more discomfort and possibly other health related difficulties.
- Theraposture chairs can be specified with a proven and reliable Anti Crush System that is designed to stop accidents from happening. It is possible for a child or a pet to become entrapped and crushed in a chair that does not have one.
- Our guarantee is for 3 years and is without restrictions. We know of no other warranty that is truly as fair and comprehensive. Read the small print and you will frequently find all is not what it seems elsewhere - often written to deceive.
- Our motors and hand controls are the best: Strong and quiet and with a current reduction system to ensure user safety. Not all electronics are the same.

I hope that these points help you to make an informed decision having considered all of the facts. Our aim is to provide the best through a combination of assessment, expertise and service. Cheapest isn't always the best and in the majority of cases, you do get exactly what you pay for. We are generally competitive on price. If we appear not to be it may be a difference in specification. Please get in touch to check and see if we can help.
