

Mascot Mk2

The world's first FULLY modular care cot – the Mascot Mk2 from Theraposture

Theraposture have introduced the next generation Mk2 Mascot care cot to take the concept of modular flexibility to the next level. This remarkable sleeping solution is designed to allow the changing needs of a user (and their carers), to be continually met and managed by adapting a modular design.

The Mascot Mk2 offers scope to adapt the electrically operated functions together with the option to alter the quantity, height and construction of doors.

Delivering safety, great looks, affordability without compromising quality, plus full modular flexibility – the Mascot Mk2 is a future proof, flexible solution.

Mascot Mk2

Fully Modular Adjustable System Cot

Why buy a Mascot Mk2?

As the market leading expert and supplier of adjustable care cots, Theraposture Ltd have concluded that there is a need for a cot bed that offers enough flexibility to change when needs change. Frequently care cots can be over specified to cater for possible future needs that are not always known. This adds to the cost and in many cases this extra specification is never needed.

The solution is a modular design that is interchangeable and adaptable so that the cot bed can be easily modified in a cost effective way.

The Mascot Mk2 is made using the finest proven materials and components available. Each cot can be individually specified without having to pay for 'a special' – every Mascot Mk2 is 'a special' but at an affordable price thanks to its modular construction.

Two easily interchangeable access options

8 door opening

4 door opening

- Meets the needs of 80% of paediatric clients
- Hand-crafted in high quality Beech wood with robust metal mechanisms and reliable motors
- Offers leading flexibility because of its modular design
- Easy conversion from four to eight doors for access to one or both sides
- Interchangeable choice of either 60, 80, 90 or 98cm high sides
- Interchangeable choice of functions including profiling, variable height and Anti-Trendelenburg
- Choice of platform sizes: 140cm (variable height only), 170cm or 200cm
- Low entry height of just 23cm to assist transfers
- Choice of interchangeable rails, Perspex or padding in any cot section
- Meets the essential BSEN 60601-2-52 safe working height requirement so potential back strain is minimised for carers
- Competitively priced and with the potential to save future cot purchases
- Available from stock with massively reduced lead times

Bespoke padding to exactly meet individual needs

With the new internal divider system, the Mascot Mk2 provides a more size-appropriate space for very young children. It also creates a storage area until such time that the divider system can be removed, when more space is needed as a

child grows. Just one product could potentially be used throughout all stages of a child's development, hence a 'whole life solution.'

Did you know that the perspex or rail door inserts are interchangeable?

Two choices in function

Mascot with KRI

Variable height only with Anti-Trendelenburg / Trendelenburg

Meets BSEN 60601-2-52 safe working height

Mascot with KR3

Variable height and profiling with Anti-Trendelenburg / Trendelenburg

Meets BSEN 60601-2-52 safe working height

Because of the modular design, these functions are completely interchangeable. On all Mk2 Mascots the variable height range is 60cm which means that the BSEN 60601-2-52 safe working height requirements are met. The starting height is just 23cm making this one of the lowest cot beds available, rising to 83cm with the entire cot bed rising to ensure that the full cot side height is maintained even in the highest position.

Simple, secure, safe and easy to use

No need for full length locking bars!

High quality and durable padding for maximum safety

1. Our SOFT clear windows are vitally important to allow visual access to and from the cot. Because they are soft, they become part of the padding and therefore the padding itself is not compromised in any way. Our windows are double 'glazed' with a pocket of air providing the cushioning and the clear material is soft and perfectly transparent.

Windows make a massive difference to a cot that requires padding as without them, the cot may appear enclosed. Equally, anything less than soft windows will present a potential for injury, or can restrict visual access.

2. When we pad a cot bed, we cut the mattress to ensure a snug fit with no gaps. This is an important safety consideration as gaps should be avoided completely if practically possible. The material that we use is mostly Panvelle or vinyl which is soft to the touch yet non-permeable, anti-bacterial, anti-microbial and anti-fungal. It can either be attached with Velcro or bolts for extra security and reinforced/anti-tear fabrics are also available.

There is a massive choice of colours, patterns and child friendly prints allowing the Mascot Mk2 to be personalised.

3. The Mascot Mk2 can be padded however you so desire. The height of the padding doesn't have to be full height or on all internal surfaces. If the padding is full height, we can also pad up and over the top edge, as often this area of the cot may cause an injury if a loss of balance occurs. Our assessment process identifies the needs, wants and risks of each situation. The recommendation that we make takes all of these considerations into account.

Because the Mascot Mk2 is modular, padding can be fitted retrospectively in the home avoiding added cost and inconvenience.

Mascot Mk2

Fully Modular Adjustable System Cot

Two finish options

Beech hardwood painted white
(special order)

Beech hardwood with coloured
rails and clear Perspex

Specification options

Max patient weight	146kg
Inner dimensions (mm)	1400x915 / 1650x915 / 1950x915
Outer dimensions (mm)	1672x988 / 1902x988 / 2202x988
Variable height	standard, 60cm
Trendelenburg	standard with lock off key
Anti-Trendelenburg	standard
Profiling	option
Castors	standard, individually braked
Platform height	23cm
Height adjustment	60cm
Door height options	60, 80, 90 and 98cm
Hoist clearance	standard
Finish	painted or natural wood with coloured rails
Material	beech hardwood
Padding	option
Safe base	option
Locking device	included
Mattress	option
Electrical back up	emergency single use lowering full back up option
Voltage	230v
Output	24v

Door height options (interchangeable)

The default arrangement is for Perspex on doors one and four with rails in doors two and three. Because the door inserts are removable, you can have any combination of rails or Perspex on the 60, 80 and 90cm Mascot, either at any time. Feed tube/ventilation holes can be specified if needed.

- 60cm (One piece full height rails and Perspex)
- 80cm (One piece full height rails and Perspex)
- 90cm (Full height rails and Perspex with strengthening batten)
- 98cm (Full height rails and Perspex with strengthening batten)

Mattresses

All mattresses that are used in the Mascot Mk2 are supplied with waterproof covers. Each mattress is cut to the exact internal dimensions of the cot bed to ensure that there are no gaps.

The choice is:

- Standard foam
- W14 low risk
- W17 medium risk
- W24 high risk

Our assessment service, Suitability Guarantee and positive outcomes.

By working with Theraposture you will be offered a free of charge home assessment service including a product demonstration. This is a vital part of our process in determining the best solution for the intended user.

Our highly experienced Trusted Assessors working with a Healthcare Professional will help to identify and understand the needs, wants and risks for each user. This process results in an assessment report which determines the correct prescription and provides a useful record and justification for the recommended cot bed.

By working with our Assessor, we will take the full responsibility for what is made and supplied. We will provide a suitability guarantee in every situation, including bespoke products, to ensure that should any issues arise within the first 14 days of use, Theraposture will either make changes, remake the product to a different specification (to an equivalent value) or will refund the cost of the product in full if preferred. Our goal is to achieve positive outcomes for all of our equipment users. Our detailed assessment procedure ensures that we get things right first time.
