

the THERACARE LEG LIFTER

A **NEW** and complete solution to actually getting legs onto the bed!

the THERACARE LEG LIFTER

The choice for homecare or residential nursing

 THERA•Posture 

We won't sell it and forget it!

the THERACARE LEG LIFTER

A breakthrough in getting legs right onto the bed without assistance.

To use the Theracare Leg Lifter, you simply need to be able to sit on the edge of the bed and then push and hold a single button – it couldn't be easier!

The Theracare Leg Lifter does exactly what its name suggests – it begins to safely lift your legs and moves them towards the bed.

There is a easy to hold handle to provide assurance and assistance in repositioning.

The Theracare Leg Lifter has been designed to enable users to safely and easily get their legs into bed. This simple daily task can prove difficult or even impossible for many people that may have lost muscle tone and therefore strength and general mobility. If getting into bed is a task too far, the general wellbeing and independence of a person may be adversely affected.

Often, the only solution to this everyday problem is to use some means of assistance. This could be another person such as a partner; family member; carer or alternatively, equipment to assist you such as a Hoist, a Rotoflex Turning Bed or a leg lifting device.

The Theracare Leg Lifter will actually lift the legs up and over onto the sleeping surface, requiring very little movement or repositioning, unlike alternative leg lifters that simply lift the legs beside the bed, this is a key difference that distinguishes the Theracare Leg Lifter from many of the alternative devices available. The motor is quiet and strong enough to lift severely oedemic (swollen) legs. For larger legs there is a wider leg rest available as an option. The Theracare Leg Lifter can be specified to be used on either side of the bed.

Theraposture have developed the Theracare Leg Lifter so that it may be used on a fully adjustable care bed - our Theracare Standard. When the bed is raised or profiled, the Leg Lifter moves with the bed allowing users to fully benefit from the bed's functions whilst being able to get into bed safely and independently.

the THERACARE LEG LIFTER

Designed to maximise independence, and reduce care cost.

The Theracare Leg Lifter is securely fixed to the bed frame so that it won't move.

The Theracare Leg Lifter actually lifts the legs ONTO the actual sleeping surface, whereas many other leg lifting devices only lift to the side.

The Theracare Leg Lifter moves with the profiling and height adjustment of our Theracare Standard Bed. This ensures that the full benefits of an adjustable bed can be experienced by users who otherwise could not achieve an independent bed transfer.

The Theracare Leg Lifter can be fitted to virtually any non functioning domestic bed. The height of the Leg Lifter is fully adjustable with straps and a stability bar that secures it to the bed. It can be fitted easily and only weighs 12kg.

The Theracare Leg Lifter is made from polyethylene making it robust and easy to keep clean.

The Theracare Leg Lifter folds neatly causing no obstruction to the carer or user.

the THERACARE LEG LIFTER

Other leg lifting solutions to consider.

the ROTOFLEX

The Rotoflex is the complete and total solution to assisting independent transfers, maintaining independence for the user within the home. Its unique rotational system can easily and safely transfer users between a sitting and sleeping position. In addition to the profiling action, its variable height function can help the user come to a standing position when getting out of bed.

the CHAIR BED

The Chair Bed is an adaptation of the Two Motor Riser Recliner Chair and offers independent control of the back section and leg rest and also reclines flat, adjusting to your favourite resting position. This product is a solution where getting into bed is no longer possible or difficult and sleeping in a chair is the only option. The chair bed has drop down arms forming a wider sleeping surface at night.

Theraposture are active members of the British Healthcare Trades Association and as such we fully comply with their code of conduct, currently awaiting OFT approval.
